

Bringing it all together

One Source for Cisco TelePresence

Complete management of your video investment

In today's fast-paced business climate, success centers on connecting with the right people at the right time and continuously building key relationships. Overcoming challenges such as distance, scheduling, travel and even fixed budgets can seem overwhelming when faced with a global marketplace.

The solution is simple: **One Source for Cisco TelePresence**

About One Source

One Source for Cisco TelePresence combines Cisco's immersive High Definition technology with BT Conferencing's comprehensive management services, allowing you to interact with people, not equipment. With One Source, you choose the right mix of conferencing services, not a standard package, to support your unique user requirements. This combination of conferencing quality and support reliability maximizes the return on your investment by driving user adoption through training, ease-of-use and a consistent user experience.

One Source reduces your costs through remote-centric support. We proactively monitor your solution with no onsite staff required. Your users enjoy the simplicity of a single application to schedule and manage all video calls with BT Engage Meeting Manager, our unique tool with the flexibility to support:

- A broad range of video endpoints including Cisco TelePresence, as well as traditional endpoints from Tandberg, Polycom and others.
- A comprehensive assortment of supported video call types including: inter-company (B2B) using the BT Global Video Exchange, telepresence, high definition and standard definition video calls.
- The flexibility to schedule and launch calls in ways that most suit their needs, from self-service to automated to producer assisted.

To make sure we deliver the best solution for your conferencing needs, our team works closely with you to deliver a comprehensive range of services with One Source for Cisco TelePresence.
