

BT One Collaborate MeetMe video

Video conferencing just got easier

BT MeetMe audio conferencing service is now video-enabled, making it easier for you to collaborate — speeding up your decision-making process and giving you more productive meetings.

By giving you a single service for all your audio and video conferencing needs, it's simple to arrange and hold a meeting. BT MeetMe video provides the flexibility to collaborate wherever you like, on the device and network best for you, using a single set of meeting passcodes to access a reservationless meeting.

Compatible with most popular devices, BT MeetMe video makes it easier to participate in meetings with a smartphone, a desktop running an instant messaging client or web browser, a dedicated video device or even large room video systems. Users can use different technology and still get a top-quality experience.

BT MeetMe video works across your network of choice – BT MPLS or public internet. In addition, the community of over 5,000 room-based systems accessible via BT's Global Video Exchange can also use the service. And, because it works in conjunction with BT MeetMe audio, you can also connect using a public phone network or BT MeetMe with Dolby Voice.

Make the most of your technology

We know that you want to use your personal devices to get the job done and make your working life as simple as possible.

Everyone becomes frustrated when conferences don't run as expected and the emphasis of the meeting shifts from doing business to making technology work. You want to use video in the workplace as conveniently as you can at home — and not just in the boardroom.

That's why we've video-enabled our audio MeetMe service. We've simply added more capability to something you already know how to use — and made video calling as easy, and as reliable, as audio calling.

Key benefits of BT MeetMe video

- It's easy and convenient — you don't need to anticipate where you might be or what type of device you might have to hand when you join a meeting
- Improve your effectiveness — remove the technical obstacles that might hold you back in meetings. It'll help you give great service to your customers and gain a competitive advantage
- Reduce costs and improve ROI — our cloud-based service means no capex. And the service is convenient, so more people will be likely to use it

Increase your productivity and job satisfaction — spend less time setting up conferences and travelling to meetings, and save money while improving everyone's work/life balance.

Why BT?

We've more than 25 years of conferencing experience and our collaboration solutions are used by 1.3 million end users across 47,000 customers — including 75 of the Fortune 500.

We know video:

- We manage over 1,000 TelePresence rooms
- We have video bridges in US, Europe and APAC, to offer a high-quality service to your global video calls
- We're a leading provider of Cisco and Polycom HD video solutions and Polycom's Global Service Provider of the Year (EMEA 2013, US 2010)
- We're a founding and board member of the Open Visual Communications Consortium.

We can also help you run scheduled video conferences because we understand that not all meetings are spontaneous. For important or large-scale events, like shareholder meetings or all-hands calls, we can organise, deliver and run the whole thing for you.

And we're committed to innovation — our unique partnership with Dolby brings you high-quality voice solutions that nobody else can offer.
