

BT MeetMe with Dolby Voice

In partnership with Dolby®, BT is delighted to bring you BT MeetMe with Dolby Voice, a best-in-class audio conferencing service that delivers natural and effective audio meetings.

Sounds and feels like in-person meetings

With BT MeetMe with Dolby Voice, meeting attendees truly feel as if they're in the same room, **no matter if they are at home, in the office, on the move or in a meeting room.** Participants are more able to engage naturally in a dynamic conversation. This service delivers:

- **high quality sound:** high definition combined with background noise reduction and audio levelling of each participant
- **voice separation:** participant voices come from different directions (just like being around the meeting room table).

More natural, more effective

Meetings become more productive because it's easier to:

- understand who is talking and what they are saying, so **more time can be spent focusing on the content**
- identify when other people are trying to join in the conversation or break in, so **everyone can participate more easily**
- understand what is said if more than one person talks at the same time, so the **conversation can flow naturally**
- run meetings with global teams when English may not be everyone's first language and accents can confuse.

Replace even more face-to-face meetings:

- Workshops/brainstorming sessions where active participation by all (and not just listening) is required.
- Executive meetings where you need a fully engaged audience making the right decisions.
- Project management with a broad range of individuals working together to approach the problem from very different perspectives.

User feedback

“ The stereo [voice separation] solution is great, much better than normal calls. ”

“ The overall experience of the audio call was excellent. A+. ”

What the experts are saying

“ BT MeetMe with Dolby Voice has to be experienced to be appreciated. ”

Andy Nilssen, Wainhouse Research

“ It's really incredible and I think quite frankly it's going to change the way our industry works. ”

Jim Burton, CTLink

The complete solution

Connecting via the internet (VoIP) enables High Quality Sound and Voice Separation.

Standard audio is enabled when you connect over traditional fixed line telephone/mobile phone (PSTN) with local dial-in numbers for over 50 countries.

The innovative Dolby® Conference Phone allows users to connect to a meeting room remotely to experience high quality sound and voice separation from all participants in the room, as well as improving the audio quality in the room itself.

So, wherever you are joining from, your meetings maintain the natural flow of conversation that makes audio conferences as good as being there.

Delivering for your business

Reduce total cost of ownership

- Reduces access costs with IP connection replacing carrier toll and conferencing toll free charges at home and abroad.

Global secure access

- Can be accessed anywhere with internet access. Communication is encrypted.

Power your UC strategy

- A great stepping stone for those organisations that are new to Unified Communication (UC), as well as a key accelerator for those with more mature UC set-ups, BT MeetMe with Dolby Voice works alongside and in conjunction with the full range of VoIP, IM and presence solutions.

Maximise the effectiveness of meetings on Cisco WebEx® and Microsoft Lync®

- Full integration with BT Cisco WebEx – audio, web and video in one meeting, using the same WebEx interface, so you can embrace a full range of online communication services at the press of a button. Share documents, visuals and key information and enjoy crystal clear Dolby Voice audio. Add a webcam to make your meetings even more compelling.
- Integration with BT MeetMe for Lync Enterprise. Extend a Lync meeting to those unable to access the Lync client. Allows users to create a hybrid audio conference with some participants joining via their Lync client and some via BT MeetMe with Dolby Voice and the Dolby® Conference Phone.

Why BT Conferencing?

With over 25 years of experience, BT Conferencing is one of the leading suppliers of conferencing services in the world; building, delivering and managing solutions for customers with a focus on helping them collaborate better internally and externally. Alongside the most advanced technology we offer tools to help you get the best from your service, with simple applications to help you launch, manage and schedule conferences from smartphones or desktops at the touch of the button. That's all backed up with training that makes the service easy to use for end-users, and increases the adoption rate within your organisation, adding value to your investment. This proven formula helps us provide our 47,000 customers with better business outcomes every day.
